

ROKSET ACE PERFORMANCE WALL BRUSH

Product Code	Size	Ferrule Thickness	Spacer Plugs	Full Filament Length	Combined Filament Weight
31125	25mm	12.0mm	1	65mm	8.0g
31138	38mm	13.0mm	2	65mm	15.0g
31150	50mm	15.2mm	2	72mm	24.0g
31175	75mm	18.0mm	2	85mm	45.0g
31100	100mm	21.5mm	2	98mm	70.0g

PRODUCT CONSTRUCTION

- 100% SRT PET 0.2mm filament
 - Solid Round Tapered filament gives superior pick-up & release, while dramatically improving smoothness & finish.
 - PET filament increases the stiffness of the brush, while also retaining wet stiffness in latex & water-based paints.
 - Filament is round and smooth in shape.
 - Filament is flagged (split at the end) to increase pick-up and create a finer finish with fewer brush marks.
 - Filament is solvent resistant.
- Epoxy bonded filament for strong attachment with no loose filament.
- Yellow plated, tin, riveted ferrule for added durability.
- Softwood handle gives a wood hand feel for when this is desired.
- 'Flat Beaver Tail Handle' design is shaped to fit perfectly into the palm of the hand, ideal for long flat strokes.

DESIGNED FOR

The shorter handle, longer filament, and convex shape of the bristles make these brushes ideal for painting large surface areas like open walls. This brush is designed for professional painters who need a quick life brush to use and abuse or DIYers who want an economical entry brush which is still up to the job when tackling their own painting. This brush has reasonable pick-up & release ability and gives a good finish.

USAGE AND STORAGE CONDITIONS

These brushes are ideal for uses with water-based paints. Brush handle should be kept out of water for prolonged periods to prevent swelling and bowing. At the end of every use the brush should be cleaned thoroughly and stored free from moisture to prolong life.
