Viroc Grey Raw

Concrete style and strength, the clever way

From raw industrial vibes to a sophisticated urban feel, concrete is on the rise in interior design. Viroc is the clever new product making concrete style more achievable [with big functional benefits].

A cement bonded particle board (CBPB) material, Viroc combines the flexibility of pine wood particles with the strength and durability of cement. With the look of real concrete panels, it's the smart way to ensure interior walls make a statement in contemporary homes, hotels, restaurants, foyers and commercial fit-outs.

Take your pick of textures, with the choice of a polished, raw or sanded finish in different colours. Select contrasting shades or juxtaposition concrete-look panels with other materials for elegant effect. Go understated or choose to stand out: Viroc makes it all possible.

And Viroc offer much more than good looks. It has the easy workability and installation of wood backed by structural strength you can count on. Great sound and thermal insulation boost the comfort factor for modern living, dining, relaxing, meeting, working or shopping.

Importantly, Viroc is non-toxic with no silica, asbestos or formaldehyde. Moisture resistant and fire retardant, it delivers compliance and peace of mind.

Ideal uses

With its concrete-look moods and variety of colours and finishes, Viroc signals a new era for internal walls.

- Restaurants
- Foyers
- Hotels and bars
- Reception areas
- Auditoriums
- Schools
- Bathrooms and kitchens
- Retail fit-outs
- Commercial fit-outs
- Table tops

There are so many great reasons to choose Viroc.

-  **On-trend, cost-effective concrete style**
Edgy, elegant concrete-look panels (in variety of finishes) for interior walls.
-  **Non-toxic**
No dangerous volatile compounds and free of silica, asbestos and formaldehyde.
-  **Sound insulation**
Delivers good sound insulation according to board thickness (airborne sound resistance up to 37 dB for thickness of 22mm).
-  **Structural strength**
The board's bending strength allows it to be used as a versatile structural support material that carries weight well.
-  **Flexibility and installation**
Viroc can be cut, drilled and sanded. The tools and fastening systems are identical to those used with wood, so installation is easy and straightforward. No need to render walls, employ specialised concrete polishers or allocate drying time.

-  **Fire retardant**
It prevents the spread of fire. According to the ignitability test conducted, it is classified as Group 1 combustible material.
-  **Pest and rot resistant**
Resistant to fungi, termites and insects.
-  **Thermal insulation**
Excellent thermal insulation, ideal for both hot and cold climates.
-  **Moisture resistant**
Impermeable to water and resistant to water vapour, however it does stain if not sealed.

Colours and textures*

Double-sided panels provide flexible finishes for different moods and styles:

- **Raw:** natural panel with cement surfaces.
- **Sanded:** panel calibrated with visible wood particles on the surface.
- **Polished:** machine polished raw side for glossier concrete-look surface.

Black (BLK) Polished | Raw | Sanded

Grey (GRY) Polished | Raw | Sanded

White (WTE) Polished | Raw | Sanded

Ochre (OCH) Polished | Raw | Sanded

Yellow (Y) Polished | Raw | Sanded

Red (RD) Polished | Raw | Sanded

* Black and Grey held in stock. Remaining colours available dependent on quantity per project. Unstocked items can have lead times for up to 12 weeks from receipt of order.
