CONCRETE FEATURE WALL PANELS

Viroc CONCRETE FEATURE WALL PANELS

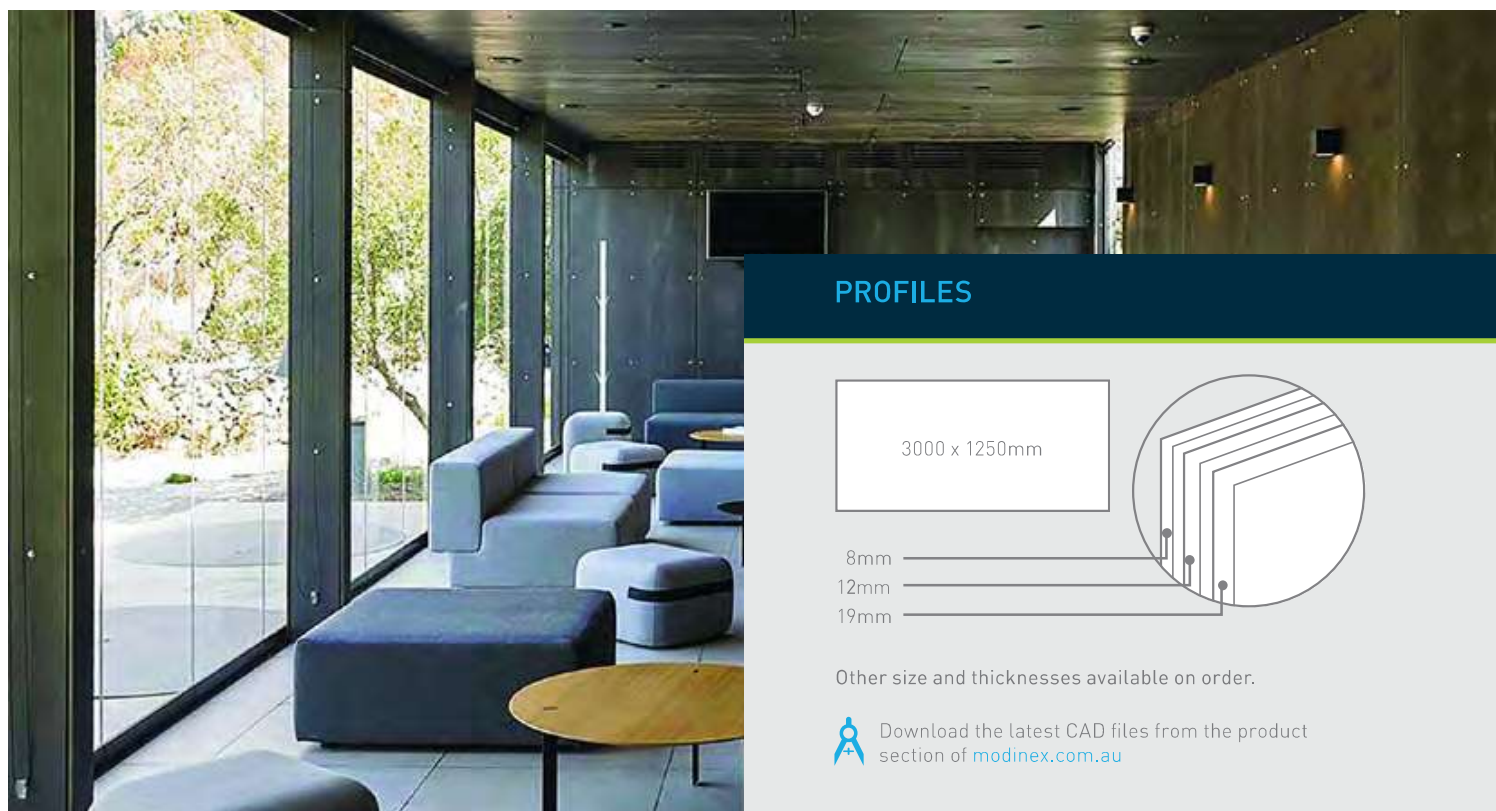

Concrete style and strength, the clever way

From raw industrial vibes to a sophisticated urban feel, concrete is on the rise in interior design. Viroc is the clever new product making concrete style more achievable [with big functional benefits].

A cement bonded particle board (CBPB) material, Viroc combines the flexibility of pine wood particles with the strength and durability of cement. With the look of real concrete panels, it's the smart way to ensure interior walls make a statement in contemporary homes, hotels, restaurants, foyers and commercial fit-outs.

Take your pick of textures, with the choice of a polished, raw or sanded finish in different colours. Select contrasting shades or juxtaposition concrete-look panels with other materials for an elegant effect.

Go understated or choose to stand out: Viroc makes it all possible. And Viroc offers much more than good looks. It has the easy workability and installation of wood backed by structural strength you can count on. Great sound and thermal insulation boosts the comfort factor for modern living, dining, relaxing, meeting, working or shopping.

Viroc

Ideal Uses

With its concrete-look moods and variety of colours and finishes, Viroc signals a new era for internal walls.

- Restaurants
- Foyers
- Hotels and bars
- Reception areas
- Auditoriums
- Schools
- Bathrooms and kitchens
- Retail fit-outs
- Commercial fit-outs
- Table tops

There are so many great reasons to choose Viroc.

Diverse Looks

Natural concrete finish. Elegant concrete-look panels (in variety of finishes) for interior walls

Sound Insulation

Delivers good sound insulation according to board thickness (airborne sound resistance up to 33 dB for thickness of 12mm)

External Application

Viroc can be used externally, including the 12mm thick with a sealant

Reversible Sheets

Polished one side and Raw the other, providing great choice options. Sanded is also available upon request

Fire Resistance

Group 1 - Fire Rated

Thermal Insulation

Excellent thermal insulation, ideal for both hot and cold climates

Zero Asbestos

Viroc sheets are completely free of asbestos

Structural Strength

The board's bending strength allows it to be used as a versatile structural support material that carries weight well. The 19mm thick sheets can be used in flooring

Machinability

Viroc can be cut, drilled and sanded according to the desired purpose

Easy to Install

The tools and fastening systems are identical to those used with wood, so installation is easy and straightforward. No need to render walls, employ specialised concrete polishers or allocate drying time

Pest and Rot Resistant

Resistant to fungi, termites and insects

Moisture Resistant

Impermeable to water and resistant to water vapour, however it does stain if not sealed

Colours and textures*

Double-sided panels provide flexible finishes for different moods and styles:

- **Raw:** natural panel with cement surfaces.
- **Polished:** machine polished raw side for glossier concrete-look surface.
